## DINOFLEX PLAYGROUND TILES

### GENERAL CLEANING & MAINTENANCE

#### ROUTINE MAINTENANCE EXTENDS LIFE AND ENHANCES APPEARANCE.

**A)** The tiles are coated with water-based mold release residue, a natural result of the manufacturing process. This will initially cause slight discoloration and slipperiness. For fast removal, apply a solution of neutral cleaner (e.g. DinoClean) and agitate with brush or mop, then rinse with water. Exposure to sun and rain will naturally remove this residue, but the process may take up to four weeks, depending on local weather conditions.

**B)** Sweeping and hosing off the surface are the most common methods of keeping the tiles clean. If surface is excessively dirty, apply a solution of neutral cleaner and water and agitate with a brush. Then rinse with garden hose. **Do not use a pressure washer to clean tiles. Do not use solvents of any kind.**

#### **C) Indoor Maintenance**

All food and drink should be restricted from indoor applications. Regular dry vacuuming is recommended with occasional damp mopping with very little water. In areas subject to food and drink spillage, the tiles should be cleaned as follows:

Use a wet-vac immediately to remove as much liquid as possible. Scrub the tiles with a soft brush and mild detergent, and then rinse with minimal water. Excess water should be drained into floor drains, or use the wet-vac to clean any liquids that have drained through the tiles. To prevent odor, bacteria growth, etc. all excess liquids must be removed. If necessary, tiles may be removed and cleaned thoroughly. Be sure that tiles are completely dry and free of foreign material before re-installing.

Dinoflex does not assume any responsibility for damages caused by chemical additives.
