# Reincarnate Take Back Program

## Features

- Closed-loop recycling system
- Simple returns process
- Reintegration into new products
- Supports circular manufacturing
- Diversion from landfill

## Benefits

- Reduces environmental impact
- Strengthens sustainability documentation
- Demonstrates corporate responsibility
- Provides measurable waste diversion outcomes
- Extends the value of your investment

Dinoflex's Reincarnate Take Back Program strengthens your project's sustainability profile by closing the materials loop. By returning used interlocking tiles for responsible recycling, you help divert valuable resources from landfills, reduce the demand for virgin materials, increase recycled material streams, and enhance product circularity. This process supports key credit areas within green building frameworks by contributing to waste diversion, recycled content utilization, and responsible end of life material processing.

Recycled regrind material

Dinoflex's Reincarnate Take Back Program strengthens your project's sustainability profile by closing the materials loop. By returning used interlocking tiles for responsible recycling, you help divert valuable resources from landfills, reduce the demand for virgin materials, increase recycled material streams, and enhance product circularity. This process supports key credit areas within green building frameworks by contributing to waste diversion, recycled content utilization, and responsible end of life material processing.

Reincarnate can support LEED, WELL, BREEAM, CHPS, Green Globes, Fitwel, NGBS, and other global certification systems that reward circularity, transparency, and reduced carbon and environmental impacts.

**Built to last. Rebuilt to last again.**
